

Karan Khokhar

B.Tech student · Artificial Intelligence & Machine Learning

karankhokhar2021@gmail.com · github.com/kran-arch · linkedin.com/in/karan-khokhar

PROFILE

AI/ML student building software through small, practical projects. Currently focused on Python, algorithms, machine-learning fundamentals, and React-based web development.

EDUCATION

CT Group of Institutions, Shahpur Campus

B.Tech · Artificial Intelligence & Machine Learning · 2026 — Present

SKILLS

Python — algorithm practice, problem solving, ML experiments

React — reusable portfolio components and project detail pages

Vite — frontend development and build workflow

Git & GitHub — version control, publishing, and deployment

Algorithms — implementation-focused practice

AI / ML — current learning focus

PROJECTS

Personal Portfolio · React, Vite, Material UI

Evidence-first portfolio with responsive sections, project logs, GitHub links, live-demo links, measurable outcomes, and reflection sections.

Python ML & Algorithm Foundations · Python, Algorithms, AI/ML

An evolving collection of implementations and experiments designed to turn study into repeatable, measurable practice.

CURRENT FOCUS

Strengthening Python and algorithm fundamentals, building small AI/ML experiments, and publishing work with source code, evidence, measurements, and clear next steps.
